- Knowledgeable in current programming technologies and standards.
- Adept at quickly acquiring new skills and learning new technologies.
- Dedicated to high software development standards.
- Excellent communication skills.

## PROFESSIONAL EXPERIENCE

11/06 – present

### **Programmer and Web Developer**

*Infinity Software Development, Design Farm, LLC.*  
Tallahassee, Florida

*Florida Association of Counties – FI-counties.com*

Technical lead on the Florida Association of Counties website redesign and development project. Led requirement gathering meetings with the client, built custom framework to allow over ten departments to manage their own content through easy to use content management system, and integrated the website with third-party tools such as WuFoo forms and Constant Contact.

*City of Winter Park – CityOfWinterPark.org*

Acted as the lead programmer, analyst, and database administrator on the City of Winter Park's website redesign effort. Responsibilities included: requirements gathering, development of a custom content management system, search engine optimization, migration of 200+ pages from the city's existing website, technical oversight of all development efforts, and implementation of the final website. The website is a vital source of information for Winter Park residents, visitors, city officials, and the media and receives over 2,000 unique visits a day.

*Broward County Housing Authority – BCHAFL.org*

Served as the lead programmer and database administrator for the Broward County Housing Authority's website redesign initiative. Developed a custom content management system which allows staff to manipulate and manage 90% of the website's content. Provided technical oversight on all development and implementation efforts.

*Florida Department of Transportation – SeeFloridaGo.com*

Worked as the lead analyst, programmer, and database administrator on the SeeFloridaGo online photography website. The website enables the general public to search, browse, and download Florida photography for use in a wide range of mediums. All of the site's photography is managed through a secured administration panel. The panel allows site administrators to upload single photos or photo batches, create multiple versions of each photo at predefined sizes, tag photos to aid in the end-user search process, and approve/deny photos uploaded by photographers.

*Florida Department of Transportation – SASHTO*

Lead developer responsible for the design and implementation of the database architecture and website programming. This website includes an administrative area

that allows SASHTO staff to control all aspects of website content.

*QLu*

Lead developer responsible for architecture and implementation of all of the website features for QLu. Notable features of this website are the integration of the website with eBay for QLu's online auctions, and the content management utility that allow QLu staff convenient control of website text, newsletters, and financial reporting.

08/00 – 11/06

**Programmer / Analyst**

*Infinity Software Development, Inc.*

Tallahassee, Florida

*Florida Center for Reading Research – PMRN*

Programmer/Analyst on the Progress Monitoring and Reporting Network, a data management system hosted by the Florida Center for Reading Research. The reports generated by the PMRN are used to plan reading instruction and to evaluate progress toward achieving Florida's goal of No Child Left Behind. Responsible for the development of enhancements both in the back-end Oracle packages/procedures as well as the C#/ASP3.0 front-end.

*Florida Department of Financial Services – ALIS*

Programmer/Analyst for the Department of Financial Services' Automated Licensing Information System (ALIS). The system is used internally by the bureau to track and record insurance licensing for the state of Florida. Primary duties include maintaining the existing applications at the DFS and coding new enhancements to the ASP, COM, and Database layers which comprise the ALIS 3-tier architecture. Tasks consist heavily of additions and modifications to business rules within Oracle packages, procedures, triggers, views, and scheduled jobs.

*Florida Department of Community Affairs – FCT AIMS*

Worked as the Visual Basic developer and SQL Server database administrator for the Florida Community Trusts' Accident Incident Management System (FCT AIMS). AIMS is used by the department to record, monitor, and track beneficiaries of government land parcel grants.

*Infinity Software Development, Inc. – IBIS 2.0*

Programmer/Analyst responsible for development of an internal employee time tracking, and client and project information management including budgeting, invoicing, payroll, and reporting. The technologies used on the project include Visual Basic.Net, ADO.Net, ASP.Net, Microsoft SQL Server, and Microsoft IIS.

*Florida Governor's Office – FilmInFlorida.com*

ASP programmer, database administrator, and technical support staff for the Film In Florida web site. The site is designed to attract filmmakers to shoot their movies in Florida. The site features a searchable list of filming locations, facts, and more.

*Florida Consortium of Charter Schools – FloridaCharterSchools.org*

ASP programmer, secondary interface designer, technical support staff, and database administrator for the Florida Consortium of Charter Schools web site. The FCCS creates a national model of high quality accredited charter schools that are student-centered and performance-driven. The web site provides information to registered users and allows administrators to compose and send out custom newsletters to users. Vendors are listed in the virtual "mall" which is maintained by FCCS staff through a set of online forms.

*Florida Department of Education – Florida School Book Depository*

Served as the ASP programmer, technical support staff, and database administrator for the FSBD web site. The site allows school staff to create textbook purchase orders for their school/institution through a collection of order forms.

*Florida Department of Education – Florida LEADS*

ASP programmer and database administrator for the Florida Leadership for Electronic Access to data for Schools web site, an online web site dedicated to providing the latest information on charter schools throughout the state of Florida. Also allows school administrators to manage their school's profile through a set of comprehensive administrative screens.

*Florida Department of Education – TeachInFlorida.com*

Interface Design and ASP programmer for e-Book project, a web-based application allowing for improved client/relationships.

*Florida Department of Corrections – MyFlorida.com*

Served as a web developer for the Florida Department of Corrections. Converted online documents to adhere to the MyFlorida.com initiative.

*Florida Department of Elder Affairs - Area Agency on Aging for North Florida*

Secondary interface designer, ASP programmer, technical support staff, and database administrator for the web site, an online web site dedicated to administering federal and state programs for seniors and their caregivers in fourteen counties. Web site allows administrators to post calendar events, answers to Frequently Asked Questions, important resources for seniors, and more.

Served as lead developer for an internal issue-tracking project. Used custom VBScript and VBA in Microsoft Outlook and Exchange to develop a bug reporting solution for use on the FCAT Explorer project.
